The *Statistical Abstract of Latin America*, edited by **James W. Wilkie** for UCLA Latin American Center Publications, has introduced a section on development of data wherein scholars are invited to interpret time-series trends or examine selected topics. The following Mexico articles have appeared to date:

Volume 22 (1982):

Samuel Schmidt, "Las Distintas

Caras de la Deuda Pública Mexicana, 1 970-1 976"

Stephen Haber, "Modernization and Change in Mexican Communities, 1930- 1 970"

Volume 21 (1981):

Stephen Haber, "Mexican Community Studies in a Historical Framework, 1 930-1 970"

James W. Wilkie and **Paul D. Wilkins**, "Quantifying the Class Structure of Mexico, 1895-1970"

John E. Kicza, "Mexican Demographic History of the Nineteenth Century: Evidence and Approaches"

Richard W. Wilkie, "The Populations of Mexico and Argentina in 1980: Preliminary Data and Some Comparisons"

Volume 20 (1980):

Roderick A. Camp, "Mexican Military Leadership in Statistical Perspective Since the 1940s"

Thomas M. Laichas, "Mexico in the U.S. Press: A Quantitative Study, 1972-1978"

Volume 19 (1978) contains, as do other volumes, articles on Latin America with an important Mexico component, for example:

Daniel I. Geffner, "Alternative interpretations of Time-Series Data on the Growth of the Latin American Film Industry, 1926-1970"

Peter Reich, "Measuring U.S. Government Perception of the 'Communist Menace' in Latin America, 1947-1976"

Marshall C. Eakin, "Determining the Population in the Largest City of Each Latin American Republic, 1 900-1970."
